Conditional break-even; bandwidth cost not modeled
Encoded/raw = 1.0
Encoded/raw = 0.8
Required local / external bandwidth
Near-memory share of remaining MAC capability (%)
External = 3.2 TB/s; unfolded sink = 6.4 TB/s; 3% extra MAC tax; 16 output shards.
Projection service only. No bank timing, SRAM tiling, physical area/energy or whole-agent speed claim.
